Independent Auditor's Report

To the Board of Directors
Community Foundation of Jackson Hole

We have audited the accompanying financial statements of Community Foundation of Jackson Hole (the "Foundation"), which comprise the statement of financial position as of December 31, 2020 and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Community Foundation of Jackson Hole as of December 31, 2020 and the changes in its net assets, functional expenses, and cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Summarized Comparative Information

We have previously audited Community Foundation of Jackson Hole's 2019 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated July 15, 2020. In our opinion, the summarized comparative information presented herein as of and for the year ended December 31, 2019 is consistent, in all material respects, with the audited financial statements from which it has been derived.

A handwritten signature in black ink that reads "Plante & Moran, PLLC".

Cash and Cash Equivalents - End of year	\$ 2,256,927	\$ 4,658,475

December 31, 2020

Note 1 - Nature of Business

Community Foundation of Jackson Hole (the "Foundation") is a Wyoming nonprofit organization created in 1989 as an affiliate of the Wyoming Community Foundation to serve Teton County, Wyoming. In 1995, the Foundation became an independent nonprofit corporation and received a distribution of assets from the Wyoming Community Foundation attributable to its funds.

The mission of the Foundation is to improve lives through philanthropic leadership by providing superior donor services; making grants that positively impact the community; ensuring sustainability of the philanthropic community; and acting as a leader, catalyst, and resource. To better serve the neighboring community of Teton Valley (composed of Teton County, Idaho and Alta, Wyoming), the Foundation established an affiliate known as the Community Foundation of Teton Valley in 2007. Based in Driggs, Idaho, the Community Foundation of Teton Valley operates as an unincorporated division of the Foundation. The core programs and services of the Foundation and its affiliate are described below.

Old Bill's Fun Run and Tin Cup Challenge: Since 1997, the Foundation has produced Old Bill's Fun Run (Old Bill's), an innovative community initiative that has generated over \$189 million since inception to support local nonprofits. Consistent with its mission, the Foundation's goal with Old Bill's is to nurture and grow communitywide philanthropy while simultaneously providing local nonprofits with a platform to increase their operating capacity; enhance public awareness of their work; expand their donor base; and easily receive a variety of gifts, including online and stock contributions. Each year, Mr. and Mrs. Old Bill create a matching grant opportunity that challenges and inspires the community to give. Through this collaborative effort, donors make a single donation to support one or more participating organizations, making giving easy and efficient. Nonprofits participate for free and receive 100 percent of donations designated to them, along with a partial matching grant, providing an effective way for them to develop broader name recognition and operating resources. To amplify these benefits, all initiative costs, including community outreach and education, promotion, gift processing, and credit card fees, are absorbed by the Foundation. In 2008, the Community Foundation of Teton Valley launched the Tin Cup Challenge, modeled after Old Bill's Fun Run, which has generated over \$16 million to date for Teton Valley nonprofits. In 2020, approximately 4,300 donors gave \$15.3 million to support 212 organizations participating in Old Bill's; over 1,200 donors gave \$1.7 million to support 47 organizations participating in the Tin Cup Challenge. For the year ended December 31, 2020, initiative expenses totaled \$15,419,316, including management costs of \$141,469, composed of gift processing and associated credit card fees, and fundraising costs of \$214,536, attributable to matching funds resource development.

Charitable Fund Management: The Foundation administers over 230 charitable funds designed to make giving easy and effective for local donors and to provide cost-effective, professional asset management for local nonprofits. Fund holders may select the fund type (advised, affinity, or designated) and structure (endowed or nonendowed) that best suits their needs and philanthropic goals. In 2020, the Foundation received approximately 900 gifts totaling \$18.6 million for its donor-advised, affinity, and designated funds and processed over 2,300 grants totaling \$18 million, including interfund grants, to benefit qualified charities working in a variety of fields throughout the United States.

Discretionary Grants, Scholarships, and Fellowships: The Foundation's Competitive, Opportunities, Youth Philanthropy, Microgrants, and other discretionary grant programs provide financial support on a competitive and discretionary basis to organizations that are effectively addressing community needs. The Edelweiss Endowment provides additional discretionary support to compelling projects across Wyoming. The Youth Philanthropy Program introduces local high school students to philanthropy and strategic grant-making, while a variety of scholarship opportunities help them to pursue their educational and vocational dreams. In 2020, the Foundation's grant programs provided over \$825,000 to 98 local organizations addressing important issues in Jackson Hole and Teton Valley, and 66 students were awarded approximately \$485,000 in scholarships and fellowships.

December 31, 2020

Note 1 - Nature of Business (Continued)

In March 2020, the Foundation launched COVID-19 response funds to address the impact of the pandemic on Jackson Hole and Teton Valley. As of December 31, 2020, over 400 donors had contributed approximately \$4.9 million to the Community Emergency Response Fund serving Teton County, Wyoming; \$3.1 million in grants had been distributed to 34 different organizations to mitigate the impact of COVID-19. Over 100 donors had contributed \$138,000 to the Teton Valley Emergency Response Fund; \$91,000 had been distributed to 6 different organizations. Throughout the year, the Foundation worked closely with nonprofits, governmental agencies, and issue-focused working groups to broadly support the community's response, providing funding to address critical needs, supporting community outreach and education, and facilitating coordination of services to identify gaps and maximize efficiency.

Workshops and Advisory Services: In recognition of Jackson Hole's and Teton Valley's isolation and relatively limited access to professional development options and advisory support for local nonprofits, the Foundation offers a variety of workshops on nonprofit management and best practices throughout the year and coordinates networking and information-sharing opportunities and services. As a recognized nonprofit leader in the community, foundation staff regularly provide technical assistance and advice to other nonprofit board and staff members. In 2020, over 700 participants from 206 different organizations attended 28 workshops, classes, and/or networking events offered by the Foundation. Almost 200 organizations are registered users of Volunteer Jackson Hole, the Foundation's online forum for volunteers, and 20 nonprofits posted 25 volunteer opportunities during 2020. Approximately 1,550 individuals currently subscribe to the Foundation's nonprofit list-serve.

Impacts of the COVID-19 Pandemic

Since being declared a pandemic on March 11, 2020 by the World Health Organization, COVID-19 has impacted millions of individuals worldwide. To combat the outbreak, governments locally and globally have implemented measures that have impacted business operations and financial markets.

The Foundation has not experienced significant decreases in contributions, grant funding, or community support during the pandemic, despite the challenges presented. The Foundation's responses to the changes in community needs are outlined above. Certain elements of the Foundation's two major programs, the Tin Cup Challenge and Old Bill's Fun Run, were changed from in-person events to virtual events.

Also in response to the impact of COVID-19, the Foundation applied for and received a Paycheck Protection Program loan in the amount of \$206,500, which was later forgiven prior to December 31, 2020 (see Note 9).

Due to the uncertainty surrounding the situation, the continuing impact, if any, to the Foundation's future revenue, expenses, cash flows, and financial condition cannot be estimated at this time.

Note 2 - Significant Accounting Policies

Basis of Presentation

The financial statements of the Foundation have been prepared on the basis of generally accepted accounting principles (GAAP). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from those estimates.

Note 2 - Significant Accounting Policies (Continued)

Adoption of New Accounting Pronouncement

As of January 1, 2020, the Foundation adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2018-08, *Not-for-Profit Entities (Topic 958): Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made*, which provides enhanced guidance to assist entities in (1) evaluating whether transactions should be accounted for as nonexchange (nonreciprocal transactions) or as exchange (reciprocal transactions) and (2) determining whether a contribution is conditional. As permitted by the ASU, the Foundation adopted the ASU with regard to revenue transactions during the year ended December 31, 2019. Adoption of the remaining portions of the ASU in the current year did not result in a change in the recognition of grants expense or restatement of prior year amounts.

Classification of Net Assets

Net assets of the Foundation are classified based on the presence or absence of donor-imposed restrictions.

Net Assets without Donor Restrictions

Net assets that are not subject to donor-imposed restrictions or for which the donor-imposed restrictions have expired or been fulfilled. Net assets in this category may be expended for any purpose in performing the primary objectives of the Foundation.

As all of the Foundation's gift instruments explicitly grant the Foundation variance power to redirect the use of assets in its sole discretion, only contributions that are encumbered by a time restriction are classified as restricted. All fund assets are managed and invested consistent with the corresponding fund agreements and are designated accordingly by the Foundation, as described below. These designations may be modified or removed by the Foundation's board of directors.

Advised and Designated

Grants from these funds are recommended by fund advisors and/or benefit-qualified charities that have been designated in advance.

Discretionary Grants and Scholarships

Discretionary grants and scholarships are distributed at the direction of the Foundation's staff and supporting committees pursuant to the goals and objectives of the fund.

Operating

Operating assets include all assets used to support the Foundation's operations, including its management and delivery of programs and services and its related administrative and fundraising expenses. Management of the Foundation's operating assets is guided by the Foundation's board rather than a fund agreement.

Endowments

Endowment funds are intended to exist in perpetuity, providing an annual distribution pursuant to the Foundation's spending policy that may be used for any of the grant-making or operating activities described above. See Note 10 for additional detail.

Note 2 - Significant Accounting Policies (Continued)

Net Assets with Donor Restrictions

Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Foundation or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity. The Foundation's net assets with donor restrictions are time-restricted receivables of \$480,000 as of December 31, 2020.

Summarized Comparative Information

The financial information presented for comparative purposes for the year ended December 31, 2019 is not intended to be a complete financial statement presentation in accordance with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the Foundation's 2019 financial statements, from which the summarized information was derived.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Foundation's cash consists of cash on deposit with banks. Cash equivalents represent money market funds or short-term investments with original maturities of three months or less from the date of purchase. Cash and cash equivalents held within any of the Foundation's investment portfolios are classified as investments and are not considered to be cash equivalents.

Investments

Investments include cash and cash equivalents (including government money market funds) considered to be part of the Foundation's investment portfolio and other investments described in Note 4. Short-term investments consist of debt securities with original maturities of 12 months or less. Long-term investments include debt securities with original maturities greater than 12 months.

Investments are initially recorded at cost, if purchased, or at fair value if donated. Purchases and sales of securities are reflected on a trade-date basis. Investments with readily determinable fair values are carried at their fair values in the statement of financial position, and the change in unrealized appreciation or depreciation of investments is included in investment return on the statement of activities. Realized gains and losses on sales of securities are based on average cost and are recorded on the statement of activities as part of investment return in the period in which the securities are sold. Interest is recorded when earned. The Foundation has elected to measure nonmarketable securities and oil and gas interests (real assets) with no readily determinable fair value at fair value subsequent to initial recognition, but the carrying value is only adjusted upon the receipt of additional valuation information.

Property and Equipment

Purchased building, furniture, equipment, and improvements are stated at cost at the date of purchase or, for donated assets, at fair value at the date of donation, less accumulated depreciation. Depreciation of property, furniture, and equipment is provided over estimated useful lives of 3 to 40 years for the respective assets on a straight-line basis. The Foundation's capitalization policy is to capitalize any fixed asset expenditures costing more than \$1,000.

Note 2 - Significant Accounting Policies (Continued)

There are no restrictions or limitations on the use of the Foundation's capitalized property, furniture, and equipment.

Nonprofit Agency Funds

In accordance with FASB standards, funds that are established by a nonprofit organization for its own benefit are classified as liabilities, even though the organization explicitly grants the Foundation variance power. The Foundation refers to these funds as nonprofit agency funds. Most nonprofit agency fund assets are invested in the long-term endowment portfolio with a liability equal to their fair value recorded under nonprofit agency funds. See Note 8 for additional detail.

Revenue and Revenue Recognition

The Foundation's primary sources of revenue are contributions and grants. Contributions, which may include noncash assets, unconditional promises to give, and beneficial interests in irrevocable trusts or other legally binding agreements, are recognized as revenue at fair value in the period unconditionally pledged or received. Conditional promises to give are not recognized until the conditions on which they depend have been substantially met or the donor has explicitly released the restriction.

Contributions received are recorded as increases in net assets without donor restrictions or net assets with donor restrictions, depending on the existence or nature of any donor restrictions. When a donor's restriction is satisfied, either by using the resources in the manner specified by the donor or by the passage of time, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statement of activities as net assets released from restrictions. Contributions with donor-imposed restrictions that are met in the current period are recorded as contributions without donor restrictions.

Contributed Services

Contributions of services that create or enhance nonfinancial assets or that require specialized skills, are provided by individuals possessing those skills, and would typically need to be purchased if not provided by donation are recorded at their fair values in the period received. No contributed services met the recognition criteria during the year ended December 31, 2020.

The Foundation benefits from the work of numerous volunteers, principally to produce Old Bill's Fun Run and the Tin Cup Challenge. Approximately 200 volunteers contributed over 1,300 hours in volunteer support during the year ended December 31, 2020.

Concentration of Credit Risk

The Foundation maintains the majority of its cash balances at two banks located in Jackson, Wyoming. These balances are separately insured by the Federal Deposit Insurance Corporation up to \$250,000.

The Foundation maintains the majority of its cash, mutual funds, equities, and government securities with three brokerage firms. Investments held by investment firms are separately insured up to \$500,000 through the Securities Investor Protection Corporation (SIPC) and up to \$70 million through other insurance providers.

Note 2 - Significant Accounting Policies (Continued)

Functional Allocation of Expenses

Costs of providing the program and support services have been reported on a functional basis in the statement of activities and the statement of functional expenses. The financial statements report certain categories of expenses that are attributable to more than one program or supporting function. Therefore, these expenses require allocation on a reasonable basis that is consistently applied. Costs have been allocated between the various program and support services based on estimates determined by management. Salaries and benefits, occupancy costs, supplies, insurance, and information technology (IT) costs are allocated based on time and effort. Although the methods of allocation used are considered appropriate, other methods could be used that would produce different amounts. The costs of activities and events that benefit more than one functional area (joint costs) are immaterial and have been allocated as described in this paragraph.

Income Taxes

The Foundation is a not-for-profit corporation and is exempt from tax under the provisions of Internal Revenue Code Section 501(c)(3).

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including July 14, 2021, which is the date the financial statements were available to be issued.

Note 3 - Liquidity and Availability of Resources

The Foundation's financial assets available within one year of December 31, 2020 for general expenditure are as follows:

Cash and cash equivalents	\$ 2,256,927
Short-term investments	<u>7,663,748</u>
Total	<u>\$ 9,920,675</u>

The Foundation manages its liquidity by structuring its financial assets to be available for grants, general expenditures, liabilities, and other obligations as they become due. The Foundation invests cash in excess of anticipated near-term needs in treasuries, money market funds, and short-term fixed-income mutual funds.

Cash required for near-term granting is estimated by examining the nature of foundation funds, whether or not they are endowed, and historical gift and grant activity. Capital preservation and liquidity are prioritized in the short-term and intermediate investment portfolios, where funds are generally subject to withdrawal at any time. Long-term endowment assets are pooled for investment with a focus on both capital preservation and principal growth. Liquidity is managed through the endowment portfolio's target asset allocation and periodic review of the portfolio's aggregate illiquidity and funding commitments.

Funds invested in the long-term endowment portfolio, including the Foundation's operating endowment, generally operate in accordance with the Foundation's spending policy, as described in Note 10. A spendable amount of approximately \$1.6 million will be made available for grant-making and administrative expenses from these funds during the next 12 months. Although there is no intention to spend more than the amount appropriated for general expenditures pursuant to the spending policy from the Foundation's operating endowment, those funds could be made available if necessary.

December 31, 2020

Note 4 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Foundation has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs, such as interest rates and yield curves, that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Foundation's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Investments that are measured at fair value using net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy below; however, their total fair value is included in the table below to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes to the methodologies used during the year ended December 31, 2020:

Level 1: Money market funds, public securities, mutual funds, and select real asset funds and real estate investment trusts (REITs): These investments are valued based on the daily reported closing price as of December 31.

Level 2: Fixed-income U.S. Treasury bills and life insurance policies: These investments are valued using pricing models, quoted prices of similar securities, discounted cash flows, or other observable inputs and are classified within Level 2 of the fair value hierarchy. Quoted prices of U.S. Treasury bills were noted on the custodian's year-end statement. Life insurance policy inputs were composed of the cash surrender value shown on the most recent statement at or before year end.

Level 3: Certain real assets and nonpublic securities: These investments were initially valued using valuation reports or estimates prepared by independent third parties. Subsequent to initial recognition, the Foundation updates the fair value carrying amounts upon receipt of additional valuation reports or similar information. In years when no additional valuation information is available and no events or other changes that may have a significant adverse effect on the securities are identified, the Foundation does not adjust the fair value, as it is impractical to do so, and there are no identified events or changes in circumstances that may have a significant adverse effect on the securities. For the year ended December 31, 2020, there were no updated valuation reports or other pertinent information received for \$430,000 of nonpublic securities and oil and gas interests (real assets) with no readily determinable fair value.

Net asset value per share: Hedge fund and private equity investments: These investments are valued based on net asset value per share of the investments.

Cash is not required to be measured at fair value. However, cash balances have been included in the table below to reconcile the investment balance to the statement of financial position.

December 31, 2020

Note 4 - Fair Value Measurements (Continued)

The following tables present information about the Foundation's assets measured at fair value on a recurring basis at December 31, 2020 and the valuation techniques used by the Foundation to determine those fair values:

Assets Measured at Fair Value on a Recurring Basis at December 31, 2020					
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Net Asset Value	Balance at December 31, 2020
Short-term investments:					
Cash in investment portfolio	\$ 4,826,758	\$ -	\$ -	\$ -	\$ 4,826,758
Money market funds	1,325,279	-	-	-	1,325,279
Fixed income - U.S. Treasury bills	-	1,199,795	-	-	1,199,795
Life insurance policies	-	311,916	-	-	311,916
Total short-term investments	6,152,037	1,511,711	-	-	7,663,748
Long-term investments:					
Public securities:					
Domestic equity	3,512,229	-	-	-	3,512,229
International equity	444,238	-	-	-	444,238
Total public securities	3,956,467	-	-	-	3,956,467
Mutual funds:					
Domestic equity	20,877,803	-	-	-	20,877,803
International equity	16,364,989	-	-	-	16,364,989
Domestic fixed income	24,462,651	-	-	-	24,462,651
International fixed income	1,947,023	-	-	-	1,947,023
Total mutual funds:	63,652,466	-	-	-	63,652,466
Other investments:					
Real assets and REITs	2,730,815	-	250,000	-	2,980,815
Hedge funds	-	-	-	10,488,824	10,488,824
Private equity funds	-	-	-	1,963,298	1,963,298
Nonpublic securities	-	-	1,671,000	-	1,671,000
Total other investments	2,730,815	-	1,921,000	12,452,122	17,103,937
Total long-term investments	70,339,748	-	1,921,000	12,452,122	84,712,870
Total investments	\$ 76,491,785	\$ 1,511,711	\$ 1,921,000	\$ 12,452,122	\$ 92,376,618

December 31, 2020

Note 4 - Fair Value Measurements (Continued)

Investments in Entities that Calculate Net Asset Value per Share

At December 31, 2020, the fair value, unfunded commitments, and redemption rules of those investments valued at net asset value are as follows:

	Fair Value	Unfunded Commitments	Redemption Frequency, if Eligible	Redemption Notice Period
Hedge funds (a)	\$ 10,488,824	\$ -	Quarterly, semiannually	95 days
Private equity (b)	1,963,298	2,875,263	N/A	N/A
Total	<u>\$ 12,452,122</u>	<u>\$ 2,875,263</u>		

(a) This category includes investments in two diversified global funds of hedge funds predominantly composed of traditional and multistrategy long/short funds. The fair values of the investments in this category have been calculated using net asset value per share of the investments.

(b) This category includes investments in private companies, both domestic and international. The fair values of the investments in this category have been calculated using net asset value per share of the investments. Certain investments cannot be redeemed because the investments have lockup periods of several years.

Note 5 - Contributions Receivable

The Foundation is the beneficiary of an irrevocable contribution to be received in future years with an estimated fair value included in net assets with donor restrictions at December 31, 2020 of \$480,000; payments are estimated at \$25,000 with an estimated 3 percent annual increase scheduled to begin in 2025 and end in 2093. The unamortized discount from 2025, the year payments begin, to the year ended December 31, 2020 is estimated at \$187,000. The contribution receivable has been discounted at an approximate rate of 7 percent. The discount amortization for the year ended December 31, 2020 was \$40,000. An allowance for uncollectible promises to give has not been recorded.

During the year ended December 31, 2016, the Foundation was informed it was named among the beneficiaries on an estate and started receiving distributions from the estate prior to the year ended December 31, 2020. During the year ended December 31, 2020, the Foundation received distributions from the estate in the amount of \$30,000. As of December 31, 2020, there were no remaining outstanding receivables from the estate.

Note 6 - Conditional Promises to Give

The Foundation's Legacy Society is composed of potential donors intending to leave a legacy for those that follow them. The gifts are dependent on unknown future events that affect timing and valuation and, accordingly, are not recorded as contributions until received.

Various donors have made conditional promises to give totaling \$995,000 in matching funds for Old Bill's Fun Run 2021, contingent upon successful execution of the event and the receipt of eligible gifts for matching. It is fully anticipated that the \$995,000 will be recognized as contribution revenue during the year ending December 31, 2021.

December 31, 2020

Note 7 - Property and Equipment

Property and equipment are summarized as follows:

Land	\$ 600,000
Buildings and improvements	1,005,384
Furniture and equipment	<u>135,739</u>
Total cost	1,741,123
Accumulated depreciation	<u>289,331</u>
Net property and equipment	<u><u>\$ 1,451,792</u></u>

Note 8 - Nonprofit Agency Funds

The Foundation accepts contributions and agrees to transfer those assets, the return on investment thereof, or both to another nonprofit organization that is specified by the donor. If a nonprofit organization establishes a fund at the Foundation and names itself as the beneficiary of that fund, the Foundation accounts for the transfer of such assets as a liability. The Foundation refers to these funds as nonprofit agency funds.

Consistent with all of its funds, the Foundation holds legal title to, and maintains variance power over, nonprofit agency fund assets and includes them in its assets on the statement of financial position. The Foundation also records a corresponding liability equal to their fair value. Most of the Foundation's nonprofit agency funds are invested in the long-term endowment pool and administered in accordance with the endowment policies described in Note 10. Financial activity associated with the Foundation's nonprofit agency funds only affects their asset and liability balances. The change in those funds is detailed below for the year ended December 31, 2020:

Beginning balance	\$ 19,553,047
Contributions	401,687
Net investment return	2,550,748
Distributions	<u>(1,273,906)</u>
Ending balance	<u><u>\$ 21,231,576</u></u>

Note 9 - Paycheck Protection Program

During the year ended December 31, 2020, the Foundation received a Paycheck Protection Program (PPP) loan in the amount of \$206,500. The PPP loan program was created under the Coronavirus Aid, Relief, and Economic Security (CARES) Act and is administered by the Small Business Administration (SBA). Under the terms of this program, the loan may be fully or partially forgiven if the loan proceeds are spent on qualifying expenses and if staffing level and salary maintenance requirements are met. The Foundation may use the funds on qualifying expenses over a covered period up to 24 weeks. Any request for forgiveness is subject to review and approval by the lender and the SBA, including review of qualifying expenditures and staffing and salary levels.

Under accounting principles generally accepted in the United States of America, government grants, including certain forgivable government loans, are recognized as income in the period in which the Foundation has substantially overcome all measurable performance-related barriers necessary to be entitled to keep the grant funds. As of December 31, 2020, the Foundation has assessed that all requirements for forgiveness were achieved and, therefore, has recorded contribution revenue of \$206,500 consistent with generally accepted accounting principles. The Foundation applied for and received notification from the SBA of forgiveness of the entire loan in November 2020.

Note 10 - Endowments

Due to the Foundation's variance power, all of the Foundation's endowment funds consist of net assets without donor restrictions that are internally designated to be managed as permanent assets in accordance with applicable fund agreements, the Foundation's investment policy, and the Wyoming Uniform Prudent Management of Institutional Funds Act. The Foundation has adopted investment and spending policies that seek to provide the greatest level of support for current, as well as future, grant-making, and administrative needs while maintaining the purchasing power of its endowment assets over time. Funds are invested with a perpetual investment horizon, focusing on diversification to minimize risk while seeking to achieve long-term growth in excess of annual distributions and fees.

The Foundation's spending policy, reviewed annually by the Foundation's investment committee, currently provides for an annual distribution of up to 4 percent of the rolling 12-quarter trailing average fair market value of endowment assets. All or a portion of the calculated annual distribution may be reinvested. Due to the endowment portfolio's low liquidity needs and very long-term investment time frame, the Foundation is willing to tolerate a reasonable degree of volatility but seeks to limit it to the minimum level necessary to achieve its return objectives in order to minimize the variability of annual distributions.

Board-designated endowments by type of fund as of December 31, 2020 are as follows:

Advised and designated	\$ 7,253,245
Discretionary grants and scholarship	10,023,570
Operating	<u>6,782,107</u>
Total	<u>\$ 24,058,922</u>

Changes in the board-designated endowments for the year ended December 31, 2020 are as follows:

Endowment net assets - Beginning of year	\$ 21,619,858
Investment return	3,013,244
Contributions	216,204
Appropriation of endowment assets for expenditure	<u>(790,384)</u>
Endowment net assets - End of year	<u>\$ 24,058,922</u>

Note 11 - Related Party Transactions

Contributions received from board members during the year totaled \$2,782,883. Contributions received from supporting organizations, as described by the Internal Revenue Code, were \$1,315,000. No other significant related party transactions occurred during the year ended December 31, 2020.

Note 12 - Retirement Plans

The Foundation sponsors a 401(k) plan for eligible employees. The plan provides for the Foundation to make a safe harbor matching contribution of 100 percent on the first 3 percent of the eligible employee's compensation plus 50 percent of the employee's compensation deferrals between 3 to 5 percent of the employee's compensation. The safe harbor matching contribution is 100 percent vested. The plan provides for the Foundation to make an employer discretionary matching contribution equal to a uniform percentage of an employee's compensation deferrals with a limit of 6 percent of an employee's compensation. The plan allows for an employer profit-sharing contribution. Eligibility requirements include a minimum age of 21 for all types of contributions in addition to completion of one year of service for employer profit-sharing contributions. Contributions to the plan and related fees totaled \$57,432 for the year ended December 31, 2020.
